

Create separate sheets with bar chart for:

- xG per team
- Oppo xG per team
- Possession per team

Create the stat using calculated field, then create a table or bar chart with team and your new stats:

- xG per shot
- xG difference
- % of recoveries = high

Create a scatterplot, plot x and y axis, add a trendline to show relationship:

- xG per shot and shot distance
- xG difference and possession
- % recoveries = high and xG against

Bonuses -

Make it visually appealing - think color schemes, labels, decimal places!
